# FreightWaves SONAR API

Leverage the high-frequency data you want, right where you need it.

FreightWaves SONAR data brings transparency into your operation by delivering mission critical data directly to your system of choice, empowering users to make better decisions faster, and improving communications across your organization.

Simple Integration

+ Best-in-class technical documentation and user help resources

+ Standardized and simple data structure and format

+ Seamlessly plugs into proprietary or off-the-shelf TMS and BI platforms

+ Fast, consistent and reliable access to vast data resources

Value-Added Customizable Solutions

+ Real-time integration of SONAR with your own data

+ Flexible integration options for virtually any operating platform

+ Dashboards and reports can be tailored to specific users and/or business needs

+ Powerful data navigation when combined with BI tools like PowerBI, Tableau, etc.

SONAR Data Automation Benefits

+ Centralize and standardize manual data processes

+ High-frequency data analytics enable more efficient allocation of limited resources

+ Faster decision-making insights increase margin/revenue capture opportunities

+ The most up-to-date, actionable intelligence pushed where and when it's most valuable

+ Deeper insights into strategic KPIs for long-term executive level forecasting and planning
