

Cass + SONAR SCI: Turning Freight Data into Strategic Action

Managing freight costs and navigating market volatility just got easier. Cass and SONAR have partnered to deliver seamless access to your truckload cost and volume data directly inside the SONAR Supply Chain Intelligence (SCI) platform.

This exclusive integration combines Cass's trusted freight audit and payment expertise with SONAR's market-leading freight intelligence giving shippers a powerful toolkit to cut costs, reduce risk, and act with confidence.

Why the Cass-SONAR Partnership is a Win for You

- ❖ **Seamless Access:** Cass customers log in through CassPort and instantly leverage their data in SONAR SCI.
- ❖ **Exclusive Partnership:** Cass is the only freight audit and payment provider integrated with SCI.
- ❖ **Unified Intelligence:** Combine Cass's Decision Intelligence Suite (Analytics + Benchmarking) with SCI's forward-looking market insights.

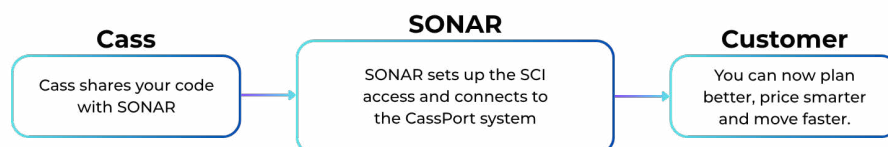

How It Works

1. Seamless Setup

- ❖ Cass shares your CassPort shipper code with SONAR, enabling SCI to recognize your organization.
 - **Benefit:** No extra setup required, your Cass data flows directly into SCI.

2. Automatic Integration and Smart Connection

- ❖ SONAR creates or connects your SCI organization, adds your CassPort credentials, and generates your login.
 - **Benefit:** Immediate access to your data with single sign-on convenience. Easily benchmark your rates instantly against SONAR's spot and contract data, without manual uploads.

Actionable Intelligence Inside SCI

- ❖ Analyze your lanes under CassPort with lane scores and risk/opportunity flags
- ❖ Identify over-market lanes for negotiation and under-market lanes for compliance checks
- ❖ Spot carrier dependency and risk zones at a glance
- ❖ Forecast spend and refine procurement strategies

Cass integrates your data, SONAR SCI transforms it into actionable insights helping you cut costs, strengthen resilience, and act decisively in any freight market
