SONAR has integrated Genlogs into the Supply Chain Intelligence (SCI) platform, empowering shippers and logistics professionals to find the right service provider, faster, smarter, and with confidence.

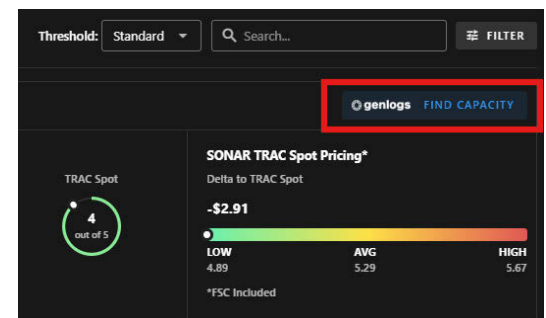

With this integration, SONAR users can move beyond traditional, time-consuming sourcing methods and gain instant access to reliable, data-backed carrier insights directly within SCI.

Enhanced “Find Capacity” — Powered by Genlogs

At the heart of this integration is SONAR's upgraded Find Capacity button. Now, users can:

- ❖ **Identify service providers** with historical lane experience
- ❖ **Access provider profiles** including contact info, MC#s, authority status, power units, and equipment types
- ❖ **Evaluate reliability and safety** through indicators like Out-of-Service (OOS) rates and Company Reliability scores

This enhancement replaces fragmented databases and manual vetting with one intelligent, data-driven workflow.

The Result: Intelligence-Driven Sourcing

SONAR + Genlogs transforms how shippers and brokers manage capacity sourcing. Moving from guesswork to actionable insights.

- ❖ **Speed & Efficiency:** Instantly locate qualified service providers who have proven performance on specific lanes.
- ❖ **Smarter Decisions:** Rely on up-to-date service provider intelligence and safety data.
- ❖ **Competitive Edge:** Secure reliable capacity faster and strengthen customer relationships through consistent service delivery.

This powerful combination equips users to stay agile in a market where speed and precision drive success.

Discover the smarter way to source capacity.
