

Rail Carload Dashboard

Understand Rail. Anticipate Demand. Stay Ahead

The **Rail Carload Dashboard** brings together rail operational performance, commodity-level volumes, and key macroeconomic indicators into a single, streamlined view. Designed to give you clarity into both current rail activity and the broader forces driving it, this dashboard helps you connect what is happening on the rails to what is happening across the economy.

Key Features & Benefits

- ❖ **Rail Terminal Dwell Times:** Track performance across Class I railroads to monitor congestion, velocity, and network efficiency.
- ❖ **Rail Carload Volumes:** Analyze total and commodity-level volumes across critical sectors including coal, chemicals, grain, automotive, and more.
- ❖ **Macroeconomic Indicators:** Understand demand drivers with indicators like building permits, manufacturing new orders and production, and industrial production across mining and manufacturing.
- ❖ **Energy Market Context:** Monitor Brent Crude and WTI alongside rail activity to better assess cost pressures and industrial demand trends.
- ❖ **Seasonality View:** Compare current total carload volumes against historical trends to quickly identify shifts from typical seasonal patterns.
